

## Training phase

simulate  $N$  times

Training data  
 $\{(\boldsymbol{\theta}_i, \mathbf{Y}_i)\}_{i=1}^N$

train

amortised

## Inference phase

Observed data  
 $\mathbf{Y}_{\text{obs}}$

Neural density  
estimator  
 $q_{\phi}(\boldsymbol{\theta} \mid \mathbf{Y})$

evaluate

Posterior  
 $q(\boldsymbol{\theta} \mid \mathbf{Y}_{\text{obs}})$
